

KC-V8 LARGE

BUILT FOR BIG FORMATS

The KC-V8 Large has been specifically designed for processing large carton formats for pharmaceutical, cosmetics, consumer goods and many more.

DESCRIPTION

The KC-V8 Large has been specifically designed for processing larger carton formats while combining maximum flexibility with a compact machine footprint. It is the ideal solution for pharmaceutical, cosmetics, food, and consumer goods applications where standard cartoning machines reach their format limitations.

Based on the proven KC-V8 platform, the Large version offers an extended format range and increased handling capabilities for bulky products and oversized cartons without compromising reliability, accessibility, or ease of operation.

Its robust mechanical design ensures precise carton handling and smooth product transfer, even with demanding formats. Combined with fast changeover times and intuitive operation, the KC-V8 Large enables economical production of both small and medium-sized batches.

👉 **For full technical details and configuration options, please refer to the KC-V8 base model.**

KEY BENEFITS

- Designed for large carton formats
- Compact and space-saving machine design
- Fast and simple format changeovers
- High process reliability through proven mechanical engineering
- Ideal for small to medium production batches
- Flexible integration of feeding, coding, and inspection systems
- Heavy-duty construction for multi-shift operation

TYPICAL APPLICATIONS

The KC-V8 Large is particularly suitable for:

- Cosmetic kits and gift sets
- Pharmaceutical products in large cartons
- Nutritional supplements
- Pouches, sachets, and flow-wrapped products
- Technical products and accessories
- Multi-pack and promotional packaging

FLEXIBLE CONFIGURATION

Like all machines from KAPPLER PACKAGING SOLUTIONS, the KC-V8 Large can be tailored to individual production requirements. Various product feeding systems, coding and serialization solutions, inspection systems, and special format ranges can be integrated to create the optimal packaging solution.

TECHNICAL DATA

- Carton Format Range: from 60x30x80mm up to 200x100x250mm
- Machine Speed: up to 45 cartons/min (depending on product and configuration)
- Changeover Time: typically less than 20 minutes (depending on product and configuration)
